

Petro Pack Packing Industries Co.

2017-2018

Company introduction:

PETROPACK produces variety of packaging products for industries such as petrochemical, chemical, cement, food, agriculture, printing and etc.

Our products are tailor made to meet each customer's requirements and expectations.

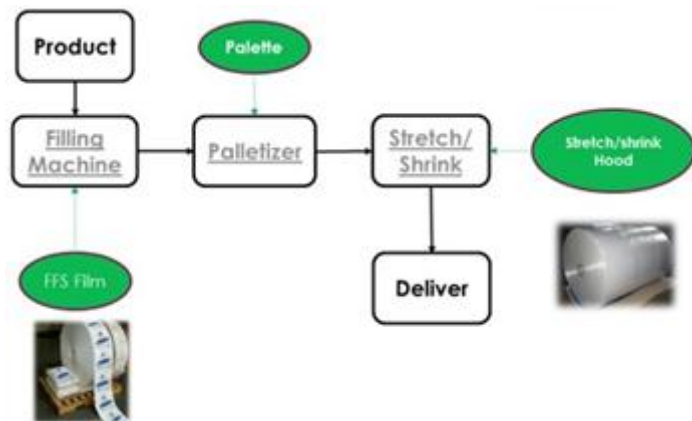

PETROPACK Packing Industries Co., established in 2003, is an independent private company as one of the distinguished quality leaders in producing heavy duty bags and packaging products in the MENA and CIS regions.

PETROPACK has been manufacturing its products with concentrating on its core competences (High efficiency machinery, expert human capital and good supply chain management). The products are continuously scrutinized by qualified inspectors using advance lab equipment in order to keep the quality consistency and meet customer satisfaction.

Our close interaction with our customers extends beyond meeting the customers' quality expectation. We take it on ourselves to provide the required services to see that our product goes through all packaging stages in customer side.

Innovative ideas and solutions, and product diversity and R&D ensure sustainability of our company and continue improvement in our services.

PETROPACK policy focuses on quality, efficiency, optimized functionality, sustainability and long-term business relationship for securing customer satisfaction. We put into operation numbers of state of the art and proven German technology from Windmöeller & Höelscher.

Our products

Product	Applications	Advantages	Pictures
FFS film (Form Fill Seal film)	Packaging granular products: petrochemical products, fertilizers, food ingredient such as sugar, cement and etc.	<ul style="list-style-type: none">-Cost-effective-Time-saving by rapid output (a bag per second)-Clear printability-Durable, reliable packaging-Sew ability-100% recyclable-Protected against moisture, dust, humidity	
Shrink hood film	Packaging various palletized products, such as bags, construction material	<ul style="list-style-type: none">-Protection of products from dust, dirt, water, weather conditions, UV.-Pallet stabilization and better shipment- No need for secondary packaging-Puncture resistance-Clarity & visible Performance	
Stretch hood film	Packaging various palletized products, such as bags, construction material	<ul style="list-style-type: none">-Pallet stabilization in horizontal and vertical axis- Reduction the plastic consumption up to 20%(Compare to other packaging)-The fastest growing applications in pallet packaging	
Shrink film	Used for general packaging applications, such as wrapping the products,	<ul style="list-style-type: none">Resistant to puncture/ Tear-Endless creative uses-Anti static surface-Roughened or slippery surface-UV Stable	

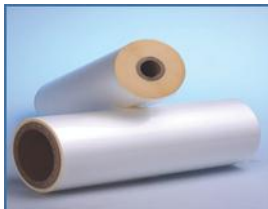

Product	Applications	Advantages	Pictures
Open Mouth Sack	Petrochemical Products -such as polyethylene Polymer compound Food Ingredient Animal Minerals Granules products	-Flexibility -Able to seal an inner liner & stitch the outer bag if needed - Resistant to Humidity and dust and prevent water ingress. -Tear resistant -Easily sealed	
Valve bags	Used for packaging of the granular and also powdery goods. The product is in the form of ready bags with valves. Used in cement, chemical, and compounding industries	-Resistant to Humidity and dust and prevent water ingress. - Its cube shape result in great palletizing - Capability to being embossed -Cleaner and more transparent printing -Tougher sacks for reducing damage and less production loss -Outdoor storage as the can endure weather and humidity condition -Effective Marketing	
Lamination film	Used for protection of various surfaces (such as metal or plastic surfaces), used complementary with fabric, plastic woven bags etc.	-Increases the longevity of print materials -completely transparent -Protection against fingerprints and smudges, stains and spills, tears and wrinkles, marks and abrasions, plus oil, grease, dirt, moisture and other contaminants	

Table of specification range of Products

Item	Description	Thickness	PVC Core	Package
1	FFS Film (PE three-layer film)	120-160 μm	6 inches	3 rolls on wooden palette
2	Tubular Stretch Hood Film	100-150 μm		one roll on wooden palette
3	Tubular Shrink Hood Film	50 - 200 μm		
4	Lamination Film	According to customers' requirement	6 or 3 inches	
5	Shrink Film (flat film for collation shrink & etc.)			
6	Valve Bag			
7	Open Mouth Bag			

Our key customers

Domestic market:

Major Iranian petrochemical companies such as:

- Bandar Imam petrochemical company
- Marun petrochemical company
- Laleh petrochemical company
- Amir Kabir petrochemical company
- Arya Sasol petrochemical company
- Mehr petrochemical company
- Jam Polypropylene petrochemical company
- Esfahan petrochemical company
- Rejal petrochemical company.

International market:

- Russia
- Philippines
- Azerbaijan
- Turkmenistan

Who needs our products and services?

All granular and powdery products can be packed in polyethylene bags like all type of polymers, food gradients, cement and etc.

Factories with particle, granular and fine powder finish product types.

Factories that palletize their products are using our products for palletizing.

Petrochemical (HDPE, LLDPE, LDPE, PP and etc.), chemical, fertilizer, flour, sugar, other foodstuff(etail/industrial), home appliances (washing machine, refrigerator), mineral water, all beverages, grain, flavorings, hygiene, cattle feed, pet food, milk powder, cement, bricks & blocks, construction materials, detergents, glass factories are our potential customers.

Petrochemical

Cement

Beverage

Construction

Agricultural

Home Appliances

Advantages and Flexibility

We have some advantages comparing to other companies in Iran and our region which makes us more flexible to work with:

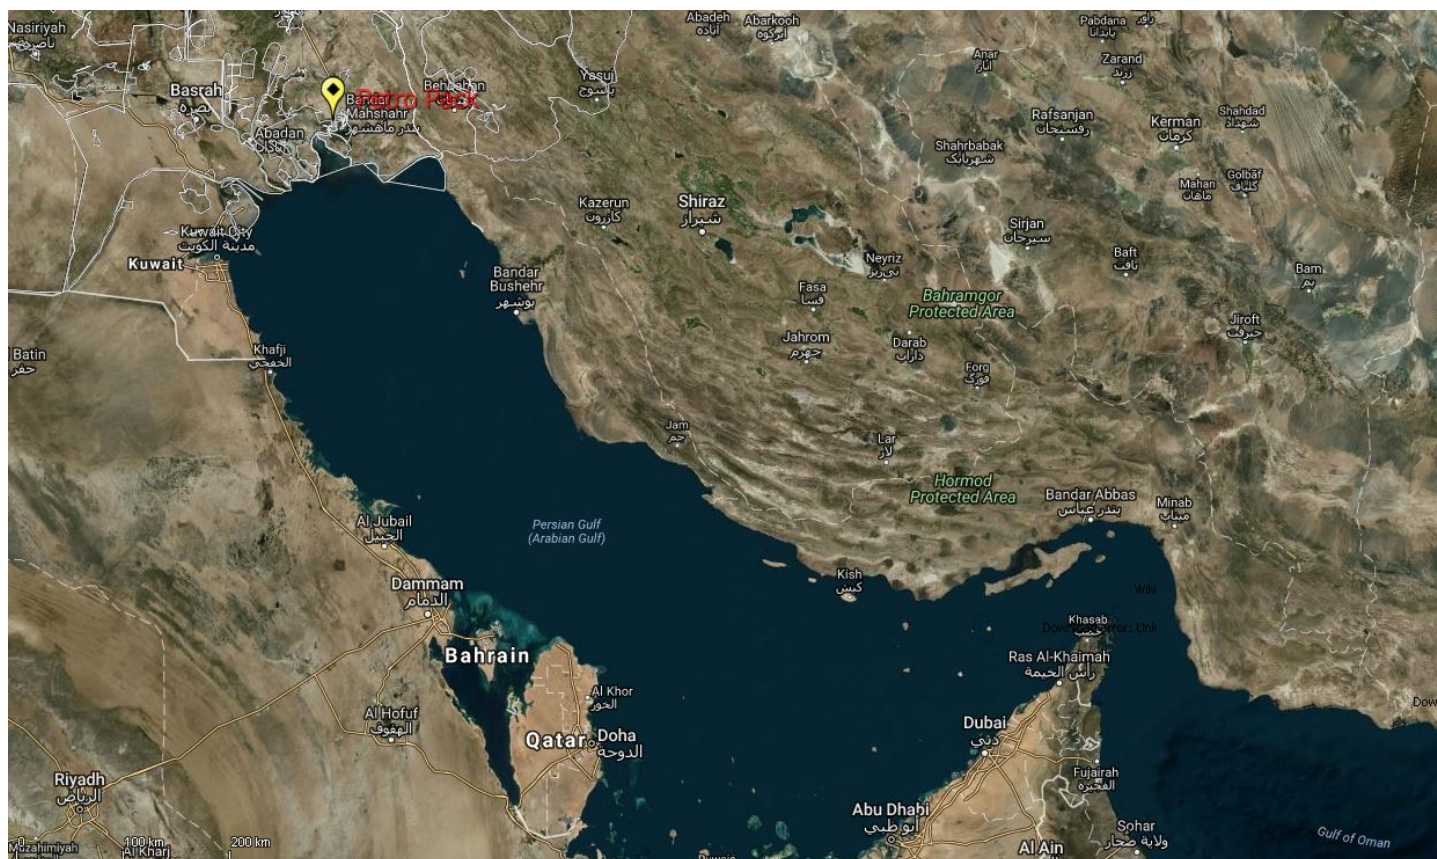

- 1. Our location:** We are in Bandar Imam petrochemical special zone in Iran. This is a tax and duty-free zone, especially organized for export. We are located next to the petrochemical companies –which are the supplier of part of our raw material. These enable us to be more competitive for export purposes (commercially and qualitatively).
- 2. Our experience:** We have been working in plastic business in Iran for more than 13 years. We have good network in Iran and we are familiar with Iranian market. We can also cooperate with you for selling the products you may have in Iran.
- 3. International network:** For smoother business process, our sister companies in all around the world are ready to assist and orders can be accepted and delivered through them.
- 4. Our Quality:** We follow ISO and standards through DAS and also are member of WPO (World Packaging Organization). The products are produced and controlled according to various ASTM standards, and are also inspected by international inspection companies –such as - before shipment/delivery to customer.
- 5. Our Know how:** By having our own R&D department we're capable and flexible to find solutions develop products for our clients.
- 6. Our Solutions:** We not only sale the finished products but we provide a whole packaging solution for our major customers to reduce their risks and costs packing line.

PETRO PACK
Packing Industries Co.
INNOVATION FOR FUTURE

Our Location

We are located in Mahshahr Petrochemical Special Economic Zone in South West of Iran.
