

Petro Pack Packing Industries Co. 2017-2018

Company introduction:

About us

PetroPack produces variety of packaging products for industries such as petrochemical, chemical, cement, food, agriculture, printing and etc.

Our products are tailor made to meet each customer's requirements and expectations.

PetroPack Packing Industries, established in 2003, is an independent private company as one of the distinguished quality leaders in producing heavy duty bags and packaging products in the MENA and CIS regions.

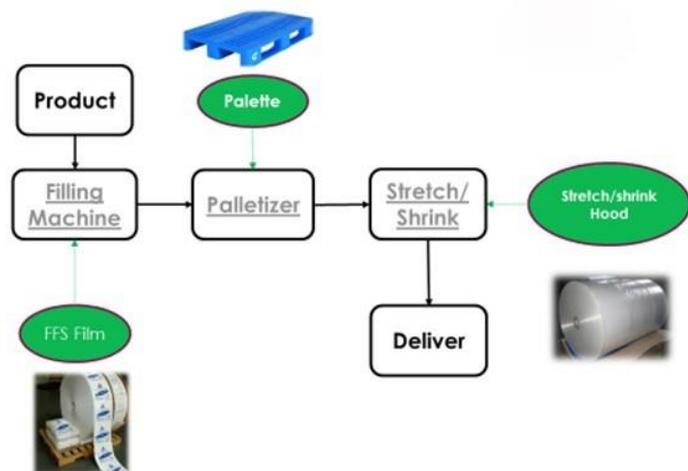

PetroPack has been manufacturing its products with concentrating on its core competences (High efficiency machinery, expert human capital and good supply chain management). The products are continuously scrutinized by qualified inspectors using advance lab equipment in order to keep the quality consistency and meet customer satisfaction.

Our close interaction with our customers extends beyond meeting the customers' quality expectation. We take it on ourselves to provide the required services to see that our product goes through all packaging stages in customer side.

Innovative ideas and solutions, and product diversity and R&D ensure sustainability of our company and continues improvement in our services.

PetroPack policy focuses on quality, efficiency, optimized functionality, sustainability and long-term business relationship for securing customer satisfaction.

we put into operation numbers of state of the art and proven German technology from Windmöeller & Höelscher.

Our Products:

Product	Applications	Advantages	Pictures
<p>FFS film (Form Fill Seal film)</p>	<p>Packaging granular products: petrochemical products, fertilizers, food ingredient such as sugar, cement and etc.</p>	<p>Good appearance Good printability Good protection of the goods against dust and humidity. 100% recyclable</p>	
<p>Shrink hood film</p>	<p>Packaging various palletized products, such as bags, construction material</p>	<p>Protection of the product against various factors such as weather, theft</p>	
<p>Stretch hood film</p>	<p>Packaging various palletized products, such as bags, construction material</p>	<p>Protection of the product against various factors such as weather, theft More energy saving compared to shrink hood film Higher packaging speed</p>	

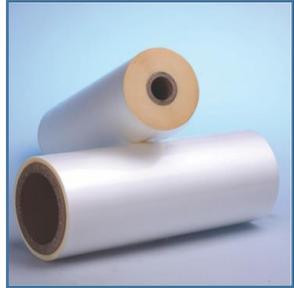

Product	Applications	Advantages	Pictures
Shrink film	Used for general packaging applications, such as wrapping the products,		
Lamination film	Used for protection of various surfaces (such as metal or plastic surfaces), used complementary with fabric, plastic woven bags etc.	Used mainly for protective purposes, cost saving	
Valve bags	Used for packaging of the granular and also powdery goods. The product is in the form of ready bags with valves. Used in cement, chemical, and compounding industries	Usable in wide range of packaging application covering both granular and powdery goods. Usable for medium and low capacity production companies.	

Table of specification range of Products

Item	Description	Thickness	PVC Core	Package
1	FFS Film (PE three-layer film)	120-160 μm	6 inches	3 rolls on wooden palette
2	Tubular Stretch Hood Film	100-150 μm		one roll on wooden palette
3	Tubular Shrink Hood Film	50 - 200 μm		
4	Lamination Film	According to customers' requirement	6 or 3 inches	
5	Shrink Film (flat film for collation shrink & etc.)			
6	Valve Bag			
7	Open Mouth Bag			

Our key customers are:

Domestic market:

Major Iranian petrochemical companies such as:

- Bandar Imam petrochemical company
- Marun petrochemical company
- Laleh petrochemical company
- Amir Kabir petrochemical company
- Arya Sasol petrochemical company
- Mehr petrochemical company
- Jam Polypropylene petrochemical company
- Esfahan petrochemical company
- Rejal petrochemical company.

International market:

- Russia
- Philippines
- Azerbaijan
- Turkmenistan

Who needs our products and services?

All granular and powdery products can be packed in polyethylene bags like all type of polymers, food gradients, cement and etc.

Factories with particle, granular and fine powder finish product types.

Factories who palletize their products are using our products for palletizing.

Petrochemical (HDPE, LLDPE, LDPE, PP and etc.), chemical, fertilizer, flour, sugar, other foodstuff(retail/industrial), home appliances (washing machine, refrigerator), mineral water, all beverages, grain, flavorings, hygiene, cattle feed, pet food, milk powder, cement, bricks & blocks, construction materials, detergents, glass factories are our potential customers.

Advantages and Flexibility:

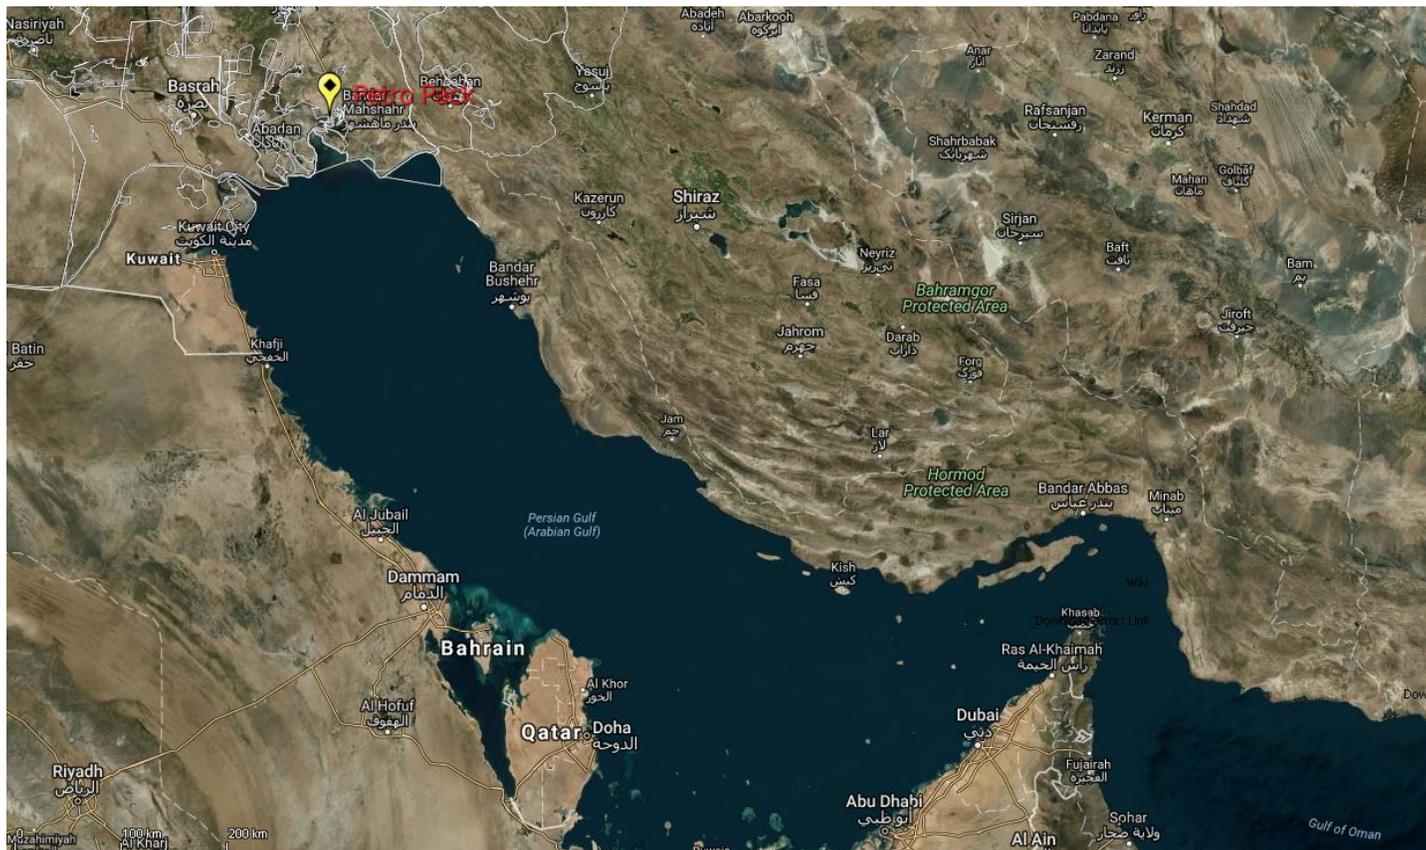

We have some advantages comparing to other companies in Iran and our region which makes us more flexible to work with:

1. **Our location:** We are in Bandar Imam petrochemical special zone in Iran. This is a tax and duty-free zone, especially organized for export. We are located next to the petrochemical companies –which are the supplier of part of our raw material. These enables us to be more competitive for export purposes (commercially and qualitatively).
2. **Our experience:** We have been working in plastic business in Iran for more than 15 years. We have good network in Iran and we are familiar with Iranian market. We can also cooperate with you for selling the products you may have in Iran.
3. **International network:** For smoother business process, our sister companies in all around the world is ready to assist and orders can be accepted and delivered through them.
4. **Our Quality:** We follow ISO and standards through DAS and also are member of WPO (World Packaging Organization). The products are produced and controlled according to various ASTM standards, and are also inspected by international inspection companies –such as - before shipment/delivery to customer.
5. **Our Know how:** by having our own R&D department we re capable and flexible to find solutions develop products for our clients.
6. **Our Solutions:** We not only sale the finished products but we provide a whole packaging solution for our major customers to reduce their risks and costs packing line.

Our Location:

We are located in Mahshahr Petrochemical Special Economic Zone in South West of Iran.
